

## MGH RESEARCH SCHOLARS | IMPACT REPORT

The unrestricted funds of the **MGH Research Scholar Awards** give recipients the freedom to pursue new ideas, publish their research findings, apply for patents, recruit new staff and generate additional funding from industry sponsors and granting agencies. Scholars' scientific collaborations enable completely different disciplines to work together and foster research collaborations around the world. As you can see, the impact of **28 MGH Research Scholars** in just four years' time has been significant. This progress would not have been possible without the generous donors to the MGH Research Scholars Program and the MGH Research Alliance.

### PUBLICATIONS

**586**

Manuscripts
